

Our tough standard sealing ring with step cut design offers exceptional reliability for non-critical sealing applications. As an oil control ring, it restricts oil flow by eliminating the straight path of leakage found in a butt cut.

Our step cut piston rings meet DIN and JIS standards and are available in many side-face and coating options.

SIZE RANGES

MATERIALS

- Cast Iron
- Ductile Iron
- Ni-Resist
- Bronze
- Stainless Steel Nickel-Based Alloys
- PTFE

Quality and Innovation Since 1929

ISO 9001:2015
CERTIFIED COMPANY

DATA SHEET STEP CUT

FEATURES

- Chamfer
- Radius
- Vent
- Scraper
- Groove
- Bronze Insert
- Taper

COATINGS

- Manganese Phosphate
- Electroless PTFE/Nickel
- Tin & Tin Nickel
- Chrome
- Silver Lead Indium

APPLICATIONS

- Mobile Hydraulic
- Industrial Hydraulic
- Shock Absorbers
- Turbocharger Assemblies
- Oil & Gas Compressors
- Hydro-Electric (Large Diameter, Steel)
